

ABSTRACT OF THE DISCLOSURE

In a system for recording digital contents  
compressed and delivered by the MPEG (Moving Picture  
Experts Group) standard, in decoding the contents, even  
5 a DCT coefficient of the digital contents is required in  
a discrete cosine transform (DCT) unit, according to the  
attribute information belonging to the digital contents,  
of the DCT coefficients within a block, some AC  
coefficients remain and the other AC coefficients are  
10 turned to 0, and the obtained DCT coefficients are again  
encoded so to create stream data for recording.
